

Quality Statement

FDS Consult recognises that, as a provider of fire safety services and products, we must ensure our operations are carried out to the highest of standards. In order to achieve this, we operate an internal quality management system that defines our working procedures and processes.

The operation of our quality management system illustrates our commitment to providing excellence in all our engineering and construction services, systems and products. Our aim is to achieve total client satisfaction for every aspect of our work.

All staff are required to carry out their assigned tasks in accordance with the operational procedures defined in the quality management system and to the best professional practices.

Training and instruction is provided to all employees to enable them to carry out their duties fully in accordance with the quality management system.

As a minimum academic requirement all of our fire engineers possess a degree in Fire Engineering. In addition to this many of our employee's have also undertaken further studies and possess Master's and PhD level qualifications in Fire Engineering, Computational Fluid Dynamics modelling and related subjects.

Beyond academic qualifications our fire engineers have a proven track record of applying fire engineering. All of our consultancy staff are registered members of the Institute of Fire Engineers and several of our staff are Chartered Fire Engineers.
